

Argie C. Pasuquin

Software Developer

Tres Borces Street, Cebu City, Philippines | 09317852852 | pasuquinargie29@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering undergraduate with hands-on experience developing web, mobile, and IoT/embedded through academic and personal projects. IT Support intern with experience in CCTV installation, networking, troubleshooting, and end-user support. Strong problem-solving and communication skills, eager to contribute and grow in a collaborative team.

SKILLS

- **Languages:** JavaScript, Python, C++
- **Front-End:** React.JS, HTML, CSS
- **Tools:** Git, VS Code, PyCharm
- **Other:** Embedded Systems, Mobile App Development, Web Application

PROJECTS

EggCubator | Tech Stack: Flet (Python Framework), Firebase, C++, ESP32, Arduino Mega, Arduino IDE

- Built a full-stack incubator monitoring system as a thesis project for the Project and Design course, aimed at chicken and egg-producing animal raisers.
- Developed a mobile app (Flet, Firebase) that lets users remotely monitor temperature and humidity and control actuators such as the incandescent bulb, fan, and humidifier.
- Built the hardware and firmware (ESP32, Arduino Mega) to read sensor data and drive the actuators, syncing to Firebase for remote control.

Portfolio | Tech Stack: React.JS

- Built a personal portfolio website with React.js to showcase projects, skills, and experience to potential employers and collaborators.

Green Valley | Tech Stack: Flet (Python Framework), Supabase

- Built a digital-twin, e-commerce-style platform for agricultural products connecting farmers directly with buyers and sponsors.
- Designed to cut out the middleman between farmer and buyer, helping farmers maximize their profit.

WORK EXPERIENCE

IT Support (Internship) | Installers Ph.

May 2025 – June 2025 | Mandaue Cebu, Central Visayas, Philippines

- Installed and configured CCTV systems and IP cameras, including mounting, alignment, and system integration.
- Performed structured network cabling (CAT5e/CAT6), terminated connectors, and labeled runs to ensure reliable connectivity.
- Conducted system testing, diagnostics, and quality checks; documented configurations and installation procedures for future maintenance.
- Provided end-user training and handover support to improve system adoption and reduce follow-up support needs.

EDUCATION

Bachelor of Science in Computer Engineering | University of Cebu Main Campus

Aug 2022 – Present | Sanciango St., Cebu City
